

Why Stress? Use the *XPRESS*

Other paddle handle release systems.

The new Q'Straint *XPRESS* time delay paddle handle.

The *XPRESS* allows for both hands to be free during the securement process.

WE KNOW THAT IN TODAY'S FAST-PACED WORLD, CONVENIENCE COUNTS MORE THAN EVER.

XPRESS

Features and Benefits:

Electric Time Delay: XPress paddle handle is equipped with a 15 second time delay.

Benefit: Allows the driver or attendant to use both hands to connect and to disconnect the wheelchair.

Manual Release: XPress paddle handle system also has a back-up manual release.

Benefit: In the event of a power failure, manual paddle release allows for securement system to function normally.

Red Light Visual Indicator: Visual RED light indicator to determine if the securement belts are unlocked.

Benefit: Support system for the driver or attendant and gives them visual assurance the wheelchair is disengaged.

Sound Indicator: A sound indicator to alert that securements are unlocked.

Benefit: This safety feature gives back-up support to the driver or attendant indicating the securements are unlocked.

Voltage: Paddle system is available in either 12 volts or 24 volts.

Benefit: Allows for use in all types of transit vehicle applications.

Warranty: XPress paddle handle has an extended 2 year warranty.

Benefit: Quality product support and peace of mind.

Durable: XPress paddle handle is made of nickel plated steel.

Benefit: Quality built and Tranist Tough!

Safety Cover: XPress paddle handle has an optional safety cover.

Benefit: Protects XPress paddle release handle from accidental release.

Convenience: The XPress time delay paddle handle release is easy to use.

Benefit: The time delay, for hands free use will reduce back injuries and liability issues.

Automatic: The XPress is fully automatic and self tensioning.

Benefit: Saves time and insures proper securement.

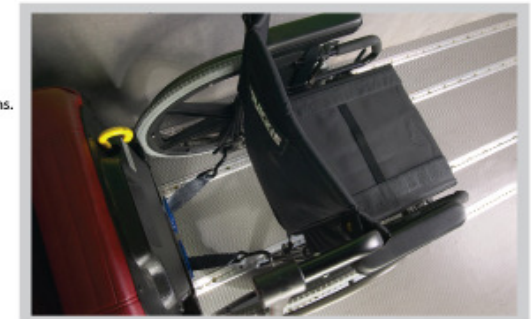

Flexible: XPress time delay release paddle handle can be used on barriers, flip up seats, bulkheads and many other applications.

Benefit: XPress can be used in transit, para-transit, and rail applications.

QRT MAX Retractors: Are compatible with the XPress.

Benefit: The fully automatic, self-tensioning, self locking features of this retractor increases the speed and ease of use of the system.
